Dr. Langley's Root and Herb BITTERS.

A COMPOUND of Sarsaparilla, Yellow Dock, Prickly Ash, Dandelion, Thoroughwort, Wild Cherry, Mandrake, and Rhubarb. Just the medicines for Ladies sure to do them good.

SPRING HAS COME.

Read consider reflect and know that after being many days cooped up on crowded factories or work-shops all summer, the Liver becomes inactive and unhealthy, the blood with vitiated humors, producing Jaundice Weakness, Loss of Appetite Dyspepsia, Headache, Costiveness, Indigestion Foul Stomach Piles, Languor, and General Debility. Now then, if you wish to remove all these, together with humors in the Blood and Skin, take Dr Langley's Root and Herb Bitters—at least one or two bottles. They always do good and never hurt. Let each and every man, woman and child have a bottle at only 25 cents for a pint, 37½ cents for a quart bottle

Now Reader herself, a sure remedy brings,
Which restores the current of life at its springs,
Pimples fly Diseases the bear to the grave
Langley's Root and Herb Bitters infallibly save;
Prevents a deadly consumptive disease wasting away,
To which the Root and Herb Bitters have not acclieved
Found,
And so we see their action they cannot do harm,
While they strengthen the system and act like a charm.
Are you a sufferer? If so—how long this medicine used
No drug's a substitute is by it infused,
Nor need this kind mother feel anxious alarm,
To the tenderest infant it cannot do harm

Is your Liver disordered? Is Jaundice this sour
Then Lee may well call both the nostrees a blow.
Do you suffer upon Headache—twill give you relief,
For Piles 'tis all sufficient—acknowledged the chief,
The most of Bay me and I'll do you good
The test experience has surely stood—
And many unto it the truth will appeal,
That the Root and Herb Bitters is every one's Friend.

Is your Appetite gone, then the Herb Bitters take
And your Energies all restored to their wake,
The Blood it will purify—redden your cheek,
And strengthen your frame should it ever grow weak,
The Ladies find it such a much friend with them
And the sole ingredients to the Herb alone
No worm, the Bitters make famous by,
Bought new bloom to the lip new fire to the eye

Sold in Bangor, wholesale and retail, by Ingraham & Fuller Guild & Harlow, and by all Druggists and dealers in Medicine in Bangor. Orono, Oldtown Stillwater Hampden, Frankfort, and Bucksport, at 25 cents a pint and 37½ cents for a quart bottle

Wholesale Depot 99 Union-street, Boston. Agents wanted in every town to sell this good medicine. apr24 d&wlm

Swim's Celebrated Panacea,

NUMBER ALTERED.

NEW ENGLAND TRUSS MANUFACTORY.

JAMES FREDERICK FOSTER,

MANUFACTURER OF

Ratchet and Spiral Trusses,

533 (opposite Old) Washington Street 533.

BOSTON, MASS

At the urgent request of Dr. Stone I have recently removed from my former stand to the above number, where I shall be happy to see my friends and the public generally.

Ladies and children will find rooms for their accommodation, and a female attendant.

Dr. Stone will continue to visit Bangor as usual, and may be consulted at the Bangor House.

Having had occasion to observe that so many persons afflicted with Hernia have suffered much from the want of a skilful application of a proper instrument, I resolved to devote my whole attention to the subject, and have taken pains to inform myself of the many defects which exist in the various kinds of Trusses now in use. I am happy to say that I have succeeded in obviating many of the difficulties complained of, and in producing an instrument which, in point of ease and security, is superior to any thing of the kind now in use. I am also prepared to furnish Trusses for children, which will be found to answer every purpose required.

Ladies and gentlemen will find at my rooms a large assortment of Trusses, Shoulder Braces, Suspensory Bandages, Elastic Stockings, Knee Caps, Anklets, Abdominal Supporters, Shower Baths, Syringes, Crutches, Chairs for Invalids, Urinals, Bed Pans, Air Cushions, Bed Rings, Leech Glasses, Cupping Glasses, Scarificators, Lancets, Trocars, Canulas, Tourniquets, Pessaries, Uterine Supporters, Breast Pumps, Nipple Shells, Nipple Shields, Nursing Bottles, Flesh Brushes, Shaving Brushes, Hair Brushes, Tooth Brushes, Nail Brushes, Clothes Brushes, Hair Dye, Tooth Powder, Cologne, Lavender, Bay Rum, Hungary Water, Rose Water, Lily White, Pomatum, Bear's Grease, Shaving Soap, Castile Soap, Honey Soap, Almond Soap, Rose Soap, Lily Soap, Shaving Cream, Sponges, Chamois Skins, Combs, Pocket Books, Portmonnaies, Wallets, Razors, Razor Strops, Pocket Knives, Scissors, Tweezers, Nail Files, Nail Scissors, Ear Scissors, Ear Trumpets, Spectacles, Opera Glasses, Pocket Glasses, Pocket Compasses, Pocket Rules, Pocket Inkstands, Pocket Pencil Cases, Pocket Pencils, Pocket Combs, Pocket Mirrors, Pocket Books, Pocket Wallets, Pocket Portmonnaies, Pocket Knives, Pocket Scissors, Pocket Tweezers, Pocket Nail Files, Pocket Nail Scissors, Pocket Ear Scissors, Pocket Ear Trumpets, Pocket Spectacles, Pocket

SATURDAY, JULY 22, 1854.

WHIG NOMINATION.

FOR GOVERNOR,

ISAAC REED,

OF WALDOBORO

Sixth Congressional District.

WHIG CONVENTION

The Whigs of the Sixth Congressional District are requested to meet in Convention at Columbus, on THURSDAY, the 27th day of July, current, at 11 o'clock, A. M. to nominate a candidate of Representative to Congress for the district.

Every town and plantation to be entitled to one delegate for each 100 inhabitants; two delegates for three 200 for 250, and one delegate for every additional 100 inhabitants above 2500.

A full delegation is earnestly requested.

J. W. JONES, } Whig
C. L. RING, } Cong. Com.
IGNATIUS SARGENT, }
July 15, 1854

Whig Congressional District Convention.

The Whigs of the Fifth Congressional District are requested to send Delegates, to meet in Convention at Exeter on THURSDAY the 17th day of August next, at 10 o'clock A. M. for the purpose of nominating a candidate to represent said district in the next Congress.

Towns having 1,000 inhabitants and under, are entitled to two delegates; over 1,000 and under 2,000, four; over 2,000 and under 3,000 six; over 3,000 and under 4,000 to eight; and over 4,000 ten. The census of 1850 to be taken to determine the number of inhabitants. By order of the Committee.

July 13th.

Money, Trade, and Commerce.

The monetary affairs of the country have been disturbed by unusual stringency and consequent closeness, of late in consequence of the undue extension of the unwarranted extravagance with which the game has been played with stocks. This, upon a protracted failure in the money market and high rates of interest paid, and the depressed price of building materials, merchandize and labor, have held the effect to diminish enterprise and to cause suspension of many works and a great lessening of work to force upon others.

In our own vicinity the effects of these causes are felt. The ruling rate of interest here for some time, has been, on good paper, about 12 per cent per annum and here there is little trade in sticks out of the immediate vicinity.

The stock of saw logs that have reached the booms and are lodged, for safe keeping on the shores of the river above the booms, is unusually large and many of them will lay over. This operates injuriously to the owners of small parcels of logs, both by making it more expensive to attend to their delivery at the booms and by lessening the demand for them among purchasers. The trade in manufactured lumber is generally healthy, and the demand equal to present supply.

There is a faint streak of light here that the money market in the large cities will, before long be easier but with the tendency of the country to buy and consume foreign goods of domestic fabric—the increasing extravagance in living in the employment of the men in almost all departments of trade to monopolies business, the next week may or only some scheme of giant rascality by which shrewd capital feel that the rock-ribbed earth beneath it shakes and it will shrink back into a snug corner, only to be tempted to come out by hope of a large interest. Thus the mutual struggles of labor and capital to get ahead of each other, will ensure rather than hasten, the end of them.

The prospect for good crops is generally flattering, both in this and in foreign countries.—This is the most satisfactory feature of the times. Food will be abundant and the price cannot continue to be extravagant.

The increase in the importation of dry goods for the year ending with June, over the corresponding time last year, is the pretty sum of $13,197 114. If these goods could remain in the hands of the importers, it would teach them a personal lesson, which, however will probably come home to the people at large, and not to themselves.

Ship-building is a great and increasing interest in Maine. The demand is so far, up to the supply, the business is fair and would be profitable under a continuation of the rates of interest.

A portion of the spree on the Milford and Lincoln railroad has been withdrawn, and a limited number of men only are employed in the preparation of work which can be done to the best advantage. This policy will keep the road somewhat, but will benefit the stock.

The purchase of the iron and the large progress in the contracts on the Penobscot and Kennebec Road make a different policy there quite advisable and the usual force is operating in the construction of the road.

The City Council have authorized the sale of two parcels of valuable real estate. In disposing of the shore lot they will secure a valuable improvement in wharfage, and make available a now unproductive piece of property.

The Market Bank in this city has gone into operation. But the multiplication of banks, although a common one and in fact as this State is concerned, a safe business, does not seem materially to add to the reduction of rates of interest, at least not to the particular relief of outsiders.

In the large cities, failures among large dealers are reported, and loans by their liabilities are represented to be from five to fifty times what they are about the 1st of May. Much the capacity to manage prudently and safely a capital of the amount, should it not appear to be a management of hundreds of thousands or millions.

The weather since the haying season commenced, has been exceedingly fine. The crop is superior in all of last year both in quantity and quality and so far has been cured in excellent order. The weather is getting quite dry, and but a rain shall soon come the late crops in Maine will be affected.

ROBBERY ON THE EASTERN CITY.—Provinces papers state that Capt Holder, who was returning to St John from Australia, while on board the steamer Eastern City was robbed of 950 sovereigns—or upwards of $4500. Search was made on board the steamer, with obtaining any trace of the lost treasure. It is supposed the thief went ashore at Portland.

Omer Pasha, the gallant Turkish commander on the line of the river Danube, is said to be a native of Austria named Hasse, who in his youth deserted his government and left it to take up his residence in the Turkish Provinces. The first Turkish village he entered was Omer Assey, hence his name Omer. He turned Mussulman, and, got in love with a damsel whom he betrothed, but who died and left him disconsolate. This determined him to join the army of Hussein Pasha, commanding at Widdin, whose good will he immediately secured and was appointed his aide de camp. He gradually rose, step by step till now the eyes of all the civilized world are directed towards him.—He is one of the most remarkable men of the age aside from his military abilities which are large. There are many men of superior ability and knowledge in the Ottoman empire, and the present war will 'drew them out,' and make them known to the world.

LECTURES ON GEOLOGY.—We understand that Dr. J. H. Boynton, who has delivered several courses of exceedingly interesting, instructive and popular lectures upon Geology, in Boston, Lowell, Portland, Bath, and other places, will soon visit our city, and he if desired will repeat his course here. We hope he may be induced to do so.—for he can assure by those interested persons who are not acquainted with Dr. Boynton that he is thoroughly versed in the sciences of which he treats, and is well adapted upon the ensuing facts, a knowledge of which is necessary to the successful illustration of the subject. He is, in fact, a lecturer of great celebrity, throughout the country.

The following statement of the receipts on the Kennebec & Portland Railroad for the months of May and June, shows a large increase of business, as compared with the same months last year:

	1853	1854
May	17 766 40	19,395 36
June	12,176 31	17,790 00
	$29 944 31	$37 685 36

This increase is much larger than was anticipated. If the business of the year holds out as good, the net income will amount to nearly six per cent on the cost of the road, which is about $2,000 000.

We have received the second number of a new monthly magazine of Science, Art Manufactures, Agriculture, Commerce and Trade entitled the United States Magazine. It is large and well filled, and judging from this number, we think the work will win its way to popular favor with great rapidity. It is published by A. Jones & Co., New York, and the price is only $3 a year.

The Directors of the Penobscot Lumbering Association have made their first assessment of seventy five cents per thousand feet for Boom age on logs that have come through the Penobscot boom this spring.

The Waterville Mail states that Mr. Andrew Crosby of that place who has been extensively engaged in railroad contracts at the West, for a few years past died of cholera, at Springfield, Illinois, last week.

Mr. Joseph Hunt, aged about 30 years, was drowned at Winnegance Mills, below Bath, on the 10th inst.

The Reciprocity Treaty.

To the Editor of The Whig and Courier

I have no time to discuss this proposed treaty generally, but I will say a few words as to its bearing on the Lumbering interests of Maine.

It gives all the British Provinces the privilege of bringing all kinds of lumber manufactured or not into all parts of the United States free of duty, and gives the United States in return, the privilege of carrying lumber into the Provinces.

Bangor and the eastern cities and towns and some of those on the Kennebec, and a large portion of the towns in the interior of the State, have flourished in the lumber business and in the purchase of timber lands, because the same principle of *Protection to American Industry* which has been applied in favor of cotton woollen, iron and other manufactures, has also been applied to lumber, and we have had the exclusive privilege of supplying with wood, bark, and lumber, those parts of the United States which were convenient to our ports. Under this system the State and individuals have sold their timber lands at high prices, mills have been built at great cost, the profits of lumber operations have been great, the wages of lumbermen and the prices of farm produce used in the woods, have ranged high. If this system is abandoned, all these things must come down—all these interests will be exposed to a ruinous competition with similar interests in the Provinces, where the price of stumpage is merely nominal. Our lumber merchants must move to Canada, New Brunswick, or Nova Scotia, where they can get for a few cents the same stumpage which here costs them several dollars. While the prices of lumber in England and other places where our Provincial neighbors have hitherto sent their lumber, are high, they may continue to send there, and not interfere very much with us; but when those markets are dull, they will pour their lumber into our markets and bring down our prices.

If the treaty becomes a law of the land, it must be to the great detriment of every branch of the lumber business of Maine, and the depression of that great interest will be found to affect the whole community.

If *Free Trade* is the true doctrine, the lumbermen of Maine are willing to be sacrificed for the good of mankind. But they will protest, I apprehend, against the adoption of that principle *against themselves alone*, while the industry of other States will enjoy protection, they will not be willing to pay an extra price for Massachusetts shoes and clothes, Pennsylvania iron, New York salt and Louisiana sugar, while their lumber is reduced in value by a competition against which other interests are protected.

I hope our Senators in Congress will see that Maine is not sold for the benefit of other States.

TIMBER.

OAK HALL, BANGOR.—We would inform our readers when they have nothing to buy that they can find the most varied and extensive stock at the above place. To drop in and see the magnificent display of Goods, with prices marked in plain figures upon each article, and satisfy yourselves that it is the best place to purchase clothing.

LAND SALES IN IOWA.—We learn from a reliable source that the entries of government lands in this State at the present time far exceed all former precedents, even the great speculative times of 1836. The gross amount of land entries in this State for the last thirty days, has not been far from $100,000 per day, and the receipts for the current year will be more likely to exceed than be less than seven millions of dollars.—Burlington (Iowa) Telegraph of July 6.

The western land fever is approaching the culminating point, when a reaction must take place. The sales are now quite large for speculation, as for settlement) and speculators must realize by-and by at a losing figure.—It is the same in all kinds of business. Sad experience has not yet conquered the American habit of over doing things.

Hon. Richard H. Dana, Jr., of Boston the noble defender of the right, in the recent slave case in Boston, is in this city, and will argue a case in court this forenoon.

On account of his professional engagements he will not be able to address our citizens on the Nebraska question, as he had been invited to do.

NEGOTIATIONS AT MADRID—A FEW WORDS IN REGARD TO MR. SOULE.—The Paris correspondent of the Cincinnati Gazette writes, that Mr. Soule has no longer any hopes of an amicable settlement of the Cuban question. The correspondent says he derives his facts and conclusions from Mr. Soule himself and that they are therefore, worthy of entire confidence.

That Cuban question could be settled' amicably enough, had not the administration started with the idea that the acquisition of that island must be included in the settlement.—There is no *other* question that cannot be amicably arranged.

THE FRANKLIN.—The telegraph gives the latest report from the Franklin, from which it appears there is no hope that she will be saved. This disaster, following so quickly on the heels of the loss of another steamer of the same line, the Humboldt, causes universal regret. The Franklin was a first class substantial ship, of 2136 tons, three years old, and is valued at $350 000 to $400 000 principally covered by insurance at New York. She has a large and valuable cargo on board—said to be the largest ever brought from France—worth about $1,000,000.—Boston Journal, 20th.

[The cargo, we understand, is taken out, but damaged to about half its value.]

THE COAL FIELDS OF THE WORLD.—From an interesting selected article, published in the Practical Mechanics Journal we condense a brief account of the coal fields of the world. Great Britain outranks the first rank, both in the quantity and quality of her coal production. The amount which she raises produces 32 000 000 tons; the United States produce nearly the same quantity; France 200 000; Prussia 3,500 000; Austria about 700 000.

Belgium, the second coal producing country on the globe, is traversed in a west north east direct on by a large zone of bituminous coal forming ton, from which she derives her supply. This zone occupies an extent of 311 square miles or about one twenty second part of her whole area. France, principal coal from forty six of her eighty six departments. This yield is divided among eight coal basins and comprises both the bituminous and anthracite varieties. Her production, which is now 4,200 000 tons was at the commencement of the French revolution, but 250 000 tons the greater part of which came from two coal fields.—The general quality of her coal is inferior to that of the British. Coal is daily getting into greater favor with the French and it may reasonably be expected that with increased demand and the growing facilities of railway transport, it will be reduced so much in price that it may be employed in gas establishments without the necessity of receiving coal from abroad. The national steam marine of France even now derives its coal from Great Britain.

Many of the provinces of Prussia are rich in coal beds similar to those of Lang and Pool, however, is in extensive use in Prussia, Bavaria and Wurtemburg. At Berlin and its environs it is employed in almost every workshop, and on account of its application to the production of gas, its consumption is regularly increasing. Austria possesses extensive coal beds but the working of them has not yet been carried on to any great extent, there being a plentiful supply of wood, and at low prices.

The United States yields bituminous and anthracite coal in abundance. She is young and vigorous. She possess railways and ships to aid in developing her inner resources, and doubtless in a few years more her coal production will be only exceeded by that of England. The following is a list of her principal coal fields:

States	Area of the States. Sq. Miles.	Coal Areas. Sq. Miles.	Proportion of coal.
1 Alabama.	50,722	9,000	1 14th
2 Georgia	58,000	400	1-58th
3 Tennessee	45,600	8,200	2 11ths.
4 Kentucky	37 0 5	14,000	1-3d.
5. Virginia	61 000	21 000	1 3d
6. Maryland	14,000	350	1 20th
7 Ohio	38,500	11,000	1-3d
8. Indiana	34,000	7 700	1 5 h
9 Illinois	55,000	44,000	3-4ths.
10 Pennsylvania	46,000	15 000	1-3d.
11 Michigan	60,000	5,000	1 12th
12 Missouri	60,000	9,000	1 6th.

The above table gives an aggregate area in 12 States of 568 283 square miles, of which 113, 132 miles, or nearly one fourth, is composed of coal beds. After making all due allowance for such coals beds as would never be reached by the miner we have left an enormous acreage.

Canada contains no workable beds of coal, but Nova Scotia New Brunswick and Newfoundland are said to be rich in the article.

Most of the minor countries in Europe yield coal. In Russia, on the Northern shore of the Black Sea, bituminous coal (brown) has been found in abundance. The richest Russian coal field is on the shores of the Sea of Azof, between the Dnieper and Dneis rivers, it is said to be equal in quality to the best Lambton, and may be delivered at a port on the Dnieper or the Don rivers for about 4s or 5s per ton.—Little is known of the carboniferous system of Northern Russia. St Petersburg is lighted with gas produced from English coal.

Coal beds are found in Egypt and various parts of Africa and Asia.

China would absorb, coming, a coal producing country.—Boston Journal.

CHEAPER PAPER.—The Long Island Vindicator says that Mr Samuel Nolan, late of Dublin, Ireland, now of New York, and his brother-in-law Dr Antisell have invented and patented a pulp-shaking machine and pulp that will materially reduce the price of paper. Dr Antisell has invented a pulp, which in its raw state will not cost more than about one sixth of a cent per pound and by the aid of the machine invented by Mr Nolan can be brought into market made into paper, at a cost of about four cents per pound. If this is true, the value of the invention is evident. It is stated that the pulp is as white and clear as the most clearly bleached cotton, and is capable of the most delicate tint.

WASHINGTON, July 19th.—The Union (government organ) to-day has premonitory symptoms of a veto of the River and Harbor bill.—But little doubt is now entertained that that will be the result.

At the annual session of the Aroostook Branch of the Maine Eastern Christian Conference, holden at Monticello, July 8th, the following resolutions were unanimously adopted.

Resolved That we sincerely regret the passage of the Nebraska bill in the Congress of the United States, and will use all honorable means for its repeal.

Resolved, That those Senators and Representatives from the Free States, who have proved *traitors* to the cause of *freedom* by voting for said bill, in our opinion, deserve to have their names handed down to posterity classed with those of Judas Iscariot and Benedict Arnold.

Resolved That in future we will give no man our votes for office who is an advocate of the infamous Nebraska measures or the fugitive slave law.

Resolved, That we still adhere to temperance principles, and our confidence in the Maine Liquor Law remains unimpaired, and no man shall have our votes for office who is in any way opposed to enforcing it.

DEATH FROM EATING UNRIPE GOOSEBERRIES.—On Saturday last a young girl about 12 or 13 years of age residing at the top of Leonard's Hill, after eating a quantity of unripe gooseberries, fell she shortly gave ill, and gradually getting worse her parents procured medical aid. She was, however, by this time too much sunk to be able medicine and she died about eight hours. The fatal consequence in this case should act as a warning to parents and guardians of young children in keeping from the latter every kind of unripe fruit.—North British Mail.

A little girl in this city died recently from the same cause. Her parents had no suspicion of her having eaten the unripe berries until she vomited them up. It was then too late to save her!—New York Evening Post.

The following are the details given of the recent street fracas in New York between Thos. F. Meagher of the "Citizen and John Mc. Master of the "Freeman's Journal."

The difficulty had its origin in an editorial article which appeared in the Freeman's Journal of last week reflecting severely upon Mr. Meagher, and accusing him of cowardice and of a breach of his parole in Van Diemen's Land. It created a great sensation among Mr. Meagher's friends, and that gentleman's partizans in person and to Mr. McMaster's office to request the retraction of the offensive passage. No satisfaction was offered and the matter got on the point of retraction, the requests were refused, Mr. Meagher left the office at the Freeman's Journal and returned to his lodgings, where he remained for some hours. At a late period of the afternoon while walking near Mr. McMaster's residence in 6th street, near the 1st avenue, the parties again met. Mr. Meagher approached Mr. McMaster with a small riding whip and struck him several times repeatedly. Mr. McMaster who was unarmed, wrenched the whip out of his assailant's hand and fired at Mr. Meagher, the ball grazing his forehead and ejecting the powder discoloring his face. Mr. McMaster after firing, attempted another shot but before he had succeeded Mr. Meagher wrenched the pistol from his grasp together with a loaded one with which Mr. McMaster was also provided. The combatants then clinched and Mr. McMaster succeeded in throwing his antagonist to the ground, where he lay bleeding and panting for the fight to come up. Mr. McMaster's injuries not supposed to be severe. At the conclusion of the affray, Mr. Meagher went in search of a policeman, and desired that both Mr. Meagher and Mr. McMaster should be taken into custody. Both were thereupon arrested and conveyed to the Jefferson Wood, and were bound over to keep the peace in the sum of $500.

DESTRUCTIVE FIRE IN NOVA SCOTIA AND LOSS OF LIFE.—On Saturday and Sunday last extensive fires were raging in various parts of this county, the long prevalence of dry weather having rendered the fires and fallen woods inflammable as tinder. Various houses along the West River Road were in great danger and it was only through the strenuous exertions of the inhabitants and persons from the town of Pictou on Sunday, that a large amount of property was not destroyed. We have heard of the most serious losses on the road between River John and Fatamagouche. During the course of Sunday, the following buildings were destroyed, viz: Mr. Peter Cumer's dwelling house, John Shearer's house and barn, Thos. Hackett's house and barn, Charles McCarty's house and barn. The house of an old woman named Shanahan was also burnt. The unfortunate owner also perishing in the flames. The growing crops, fences, and other property of Mr. Ephraim Lungley and Mr. Thomas Neville and a quantity of deals belonging to them ready for the market, were also burnt.

The loss serious as it is, must have been much more extensive but for the copious showers that providentially fell on Sunday night, after the hand of man had proved incapable of staying the devouring element.—Pictou Chronicle.

BRANCH OFFICE IN MAINE.

No. 5 Market Square, Portland.

G. F. GARGENT & CO., Agents for Dr. Hay and Physician, is the duly Authorized General Agent for my Medical Discovery for the State of Maine, and that he is supplied with the Genuine, direct from my Laboratory.

DONALD KENNEDY.

N. B. $1,00 Per Bottle,

for the unskilful practice of those who unlawfully will be assisted.

Take notice, BEWARE of that which may be offered at a less price.

Notice to the Druggists of Maine.

The great sale and demand I experience for my Medical Discovery had entirely exhausted my stock of Pasture Weed before this year's crop matured by which I was compelled to all preparations for several weeks.

From the first of April to the 15th of May, I sold over 25,000 bottles. This article consumed a large quantity of herbs.

I am happy to inform you that for the future I shall be able to supply you with any amount you may require by applying to my General Agent D. H. Hay, Druggist, Portland.

DONALD KENNEDY.

Roxbury, Mass.

Agents for Bangor and vicinity, G. F. SARGENT & CO. Druggists, No. 5, corner Smith's Block.

B. L. I.—ATTENTION.

The members of the "Bangor Light Infantry" will meet at this Armory on *Monday Evening next*, at 7½ o'clock. A punctual attendance is requested. jy22 C. W. ROBBINS, Clerk.

A CARD.

The undersigned is taking leave for the present of his Bangor friends and customers, would thank them for the liberal patronage, and respectfully solicits for the new firm a continuance of their favors. Mr. Hall with whom I am associated in business is well and favorably known to the public as a practical mechanic, and will give his personal attention to the business in this city.

JAMES McCLURE.

June 15. Late McClure & Co.

Holloway's Pills for the cure of Coughs, Colds, and Asthmatical Complaints.—These truly valuable Pills are the most efficient remedy ever discovered for the cure of coughs, colds and asthma. Persons of the most delicate organs of such disorders. Together with effects on all the chest yield to their curative powers. They speedily remove any irritation of the throat, whereby its respiratory organs can perform their functions, and after a short and passing care will find themselves as free from pain and suffering as a child. In the chest and liability of treating it, and though it will have resistance to those well known ills, it removes a radical cure.

FARMS FOR SALE.

The remainder of my Farm in Hampden near Roberts' steam mill, containing about 14 acres of land under high cultivation, having a large barn, nearly new, a young nursery of about 1000 fruit trees, under a good system of grass; will cut 13 to 15 tons of hay and there are about 2 acres under cultivation. Now is the time to examine it. Also a lot of about 7 acres, well covered with wood, lying half a mile back.

Also a farm, 11 miles from the city, in Clifton of about 150 acres of excellent land, adjoining Leonard's Pond, a part of which is excellent meadow, and it is estimated that it will cut 40 tons of hay this year—and there are 7 acres laid down with oats and wheat. They will be sold with or without the crops and at good bargains. Apply immediately to

WM. MANN, Bangor.

KENNEY'S
MEDICAL DISCOVERY.
The Greatest of the Age!

MR KENNEDY of Roxbury, has discovered in one of our native woods, a sure remedy for all the worst forms of Scrofula known as a common Pimple. He has tried it in every case he undertook and never failed except in two! He has now in his possession upwards of two hundred certificates of its value all within twenty miles of Boston

Two Bottles are warranted to cure a worm some months.

One to three bottles will cure the worst kind of pimples on the face

Three to three bottles will cure the worst kind of blotches on the face

Two to three bottles are warranted to cure the worst case of ringworm

Two bottles are warranted to cure the worst kind of tetter

Two bottles are warranted to cure the worst case of erysipelas

One to two bottles are warranted to cure all humors in the eyes

Two bottles are warranted to cure running in the ears and blotches in the hair

Four to six bottles are warranted to cure corrupt and humid ulcers

One bottle will cure scaly or pimply of the skin.

Two to three bottles are warranted to cure the worst case of running worm

Two to three bottles are warranted to cure the most desperate cases of rheumatism

Three to six bottles are warranted to cure saltrheum

Five to eight bottles will cure the very worst case of Scrofula

A benefit is always experienced from the first bottle, and a perfect cure warranted when the above quantity is taken

Nothing but the unprobable to those who have in vain tried all the wonderful medicines of the day is that a common weed, growing upon the pastures, and dung old stone walls should cure every humor in the system yet it is now a fixed fact—If you have a humor it has to start. There are no if's nor ands about it, saving some cases but not yours. He has peddled over a thousand bottles of it in the vicinity of Boston, and knows the effects of it in every case. It has already done some of the greatest cures ever done in Massachusetts. He gave it to children a year old, to old people of 80 years, and has seen them of both sexes, children whose flesh was sore and slimy, restored to a perfect state of health by one bottle.

To those who are subject to a sick headache one bottle will always cure it. It gives great relief in all cases of dizziness. Some who have taken it have had a costive for years, and have been regularized by it. Where the body is sound it works quite easy, but where there is any derangement of the fluid some of the last it will excessively purge and operate, but you must not be alarmed—they always disappear in from four days to a week. There is never a bad result from it—on the contrary, when that feeling is gone, you will feel yourself like a new person. I heard some of the most extraordinary encomiums of it that ever man listened to

No change of diet ever necessary. Eat the best you can get, and enough of it.

RAYNHAM, Sept. 19, 1853.

This is to certify that Dr. KENNEY, Druggist of Portland, is the duly AUTHORISED GENERAL AGENT for my MEDICAL DISCOVERY for the STATE OF MAINE, and that he is supplied with the GENUINE, direct from my Laboratory

DR. ORDWAY'S
HUMOR DISCOVERY!

DR ORDWAY has been using his Blood Purifier in his practice for the last seven years, with great success. He has often been urged by his friends and those who have tried it and know its efficacy, to put it within the reach of all. He has now added to it an Herb discovered in California by *Dr Kelley*, which makes it the most wonderful remedy for

Humors of All Kinds,
Liver Complaints and Chronic Diseases.

The virtues of this Herb were first made known to Dr Kelley by an Indian, while attending a patient sick with that terrible disease the Cutaneous Erysipelas, and Liver Complaint. The effect was miraculous, curing the man in a few days.

Hundreds are taking this medicine, after trying all sorts of the remedies, and say the half was never told them

If you have Erysipelas three to five bottles will cure it.

If you have Scrofula, three to seven bottles will cure it

Three to six bottles will cure Salt Rheum

One or two bottles will cure Pimples on the face

Two or three bottles will cure Scaly Eruptions and Scald Head

One to three bottles will Cleanse the System of Boils

Two to five bottles will cure Rheumatism

Three or four bottles will cure old running Sores and Ulcers.

One to two bottles will cure Barber's Itch

One to three bottles will cure Canker in the Mouth and Bowels

For Liver Complaints and Jaundice,

Its effects are new and wonderful rendering injurious from the Liver opening the pores of the skin carrying off the morbid matter, relieving the side and all gone feelings off the stomach and removing low spirits and despondency, which is the result of this disagreeable and often fatal disease.

FOR DYSPEPSIA

A fair trial will convince you there is nothing like it

FOR CANCEROUS HUMORS,

It is the surest remedy ever offered One widow Lady in Lawrence has been troubled with cancer or years—by taking two bottles says she is now quite well

FOR COSTIVENESS,

One gentleman says that it was the only medicine which ever gave him

FOR KIDNEY DIFFICULTIES,

I is spoken of in the highest terms

A young man was sick and in with Asthma so bad as to leave college, after 3 bottles cured him, and he has now returned his studies

One lady in Salem was perfectly cured of *Female Weakness* by the use of two bottles

Mr Williams, of Lawrence, had humors in his Eyes for years, was cured by the use of the Humor Discovery and Blood Purifier

For Chills and Fever, Mercurial Diseases Taints in the system, it stands unrivalled, sometimes it has the system so much deranged it will cause disagreeable sickness, but continue the use as the inductions are favorable they are entirely vegetable, and its compound and proportions are such that the effect is perfectly satisfactory and safe.

More evidence of the wonderful effects of the Humor Discovery and Blood Purifier—Bad Case of Erysipelas and Liver Complaint cured.

HAVERHILL, Mass, Nov 14, 1853.

MESSRS. ORDWAY & Co.—Although I am not in the habit of writing you to say that your Ointment or medicine has effected me, yet I feel it my duty to do it, that the afflicted may know of its efficacy, and
